

Pedagogical card

"Observation calendar"

TASK:	To adopt a place of natural interest by student
OBJECTIVE:	to notice changes in the place and provide the information of these changes
DURATION:	6 months, from December till May
MATERIAL:	Spacially designed Observation Calendars which students fill in with the information and the photographs of the place
PROCEDURES:	Individual or group activity, it can be organised during Biology or Geography lessons or after school in case students observe the place by themselves
EVALUATION:	Quality, care
TIPS:	<p>The observation must be made at least once a month</p> <p>Photographic evidence must be taken periodically</p> <p>It has to be a place where the changes are going to be visible</p> <p>Before we start the task we have to give students time to choose the place and prepare the short description of the places</p>
OUR EXPERIENCE:	<p>An activity that students like a lot</p> <p>It gives them opportunity to find out interesting things about local flora and fauna</p>
